

I urge the FCC to reject the National Association of Broadcaster's (NAB) petition 04-160 to block XM Satellite Radio from offering Instant Traffic and Weather. As a subscriber to XM radio, these services are an important part of the service they provide to me and all of their customers. This attempt by the NAB to interfere with the rights of this broadcasting service and its customers has now legal basis and should be soundly defeated.

Thank you for your time in this matter.

Marcia LaHaie
